

6" Forestry Tree Shears with Rotation

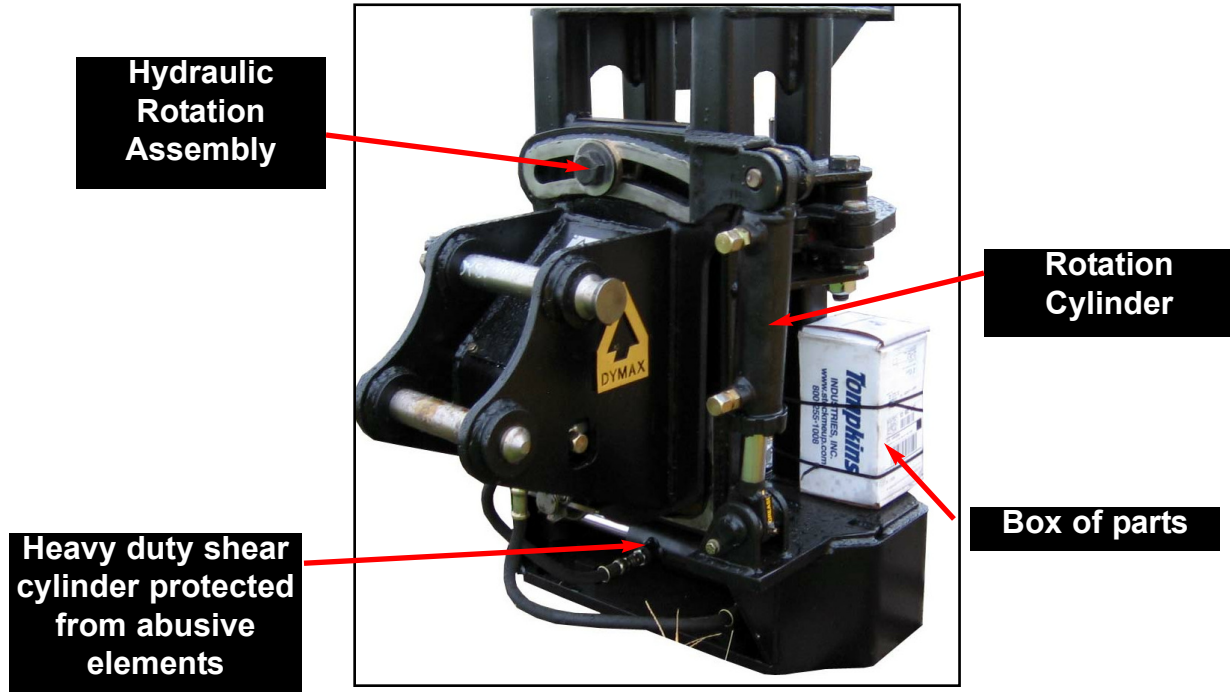

for Compact Hydraulic Excavators

Dymax 6" Rotating Tree Shears are ideal for compact excavators working in congested sites.

-
- **Dymax 6" Forestry Tree Shears** are perfect tools for maintaining canals, power line right-of-way maintenance, thinning and general land clearing.
 - A **Dymax 6" Forestry Tree Shear** is setup with horizontal hydraulic rotation which gives operators precision placement during operation.
 - **Dymax 6" Forestry Tree Shears** feature a single arm grapple that securely grabs the tree as the shear arms are activated.
 - The **Dymax 6" Forestry Tree Shear** is designed for compact excavator machines up to 15,000lbs.
 - Shearing cylinder is rated at 20700 kPa and optimum results will be obtained near those levels.
 - Shear blade is comprised of 12.70mm Hardox 400 high tensile steel and is easily replaced when worn.
 - Machine must be equipped with auxiliary valve, controls and two way hydraulic flow. Rotation circuit operates through a supplied diverter valve.

Box of parts

Hydraulic Cylinders are all rated 20,670kPa maximum

Hydraulics	Bore	Stroke	Rod Diam
Shear Cylinder	76.2mm	152.4mm	38.1mm
Grapple Cylinder	50.8mm	152.4mm	31.7mm
Rotation Cylinder	50.8mm	101.6mm	28.7mm

Dimensions	6" Rotating Forestry Shear
Height (mm)	879.00 mm
Depth (mm)	976.00 mm
Width across base (mm)	672.00 mm
Shear Blades (mm)	12.7mm thick AR400 steel
Weight (kg)	295.00
