

8" Forestry Timberwolf Tree Shear

for Hydraulic Excavators and Backhoe Loaders

Dymax 8" Forestry Timberwolf Tree Shears are perfect tools for utility work, such as power line right-of-way maintenance, thinning and land clearing.

Dymax 8" Forestry Timberwolf Tree Shears feature a single shearing ram that powers two individual shearing arms. A single arm grapple secures the tree prior to shearing through a sequence valve.

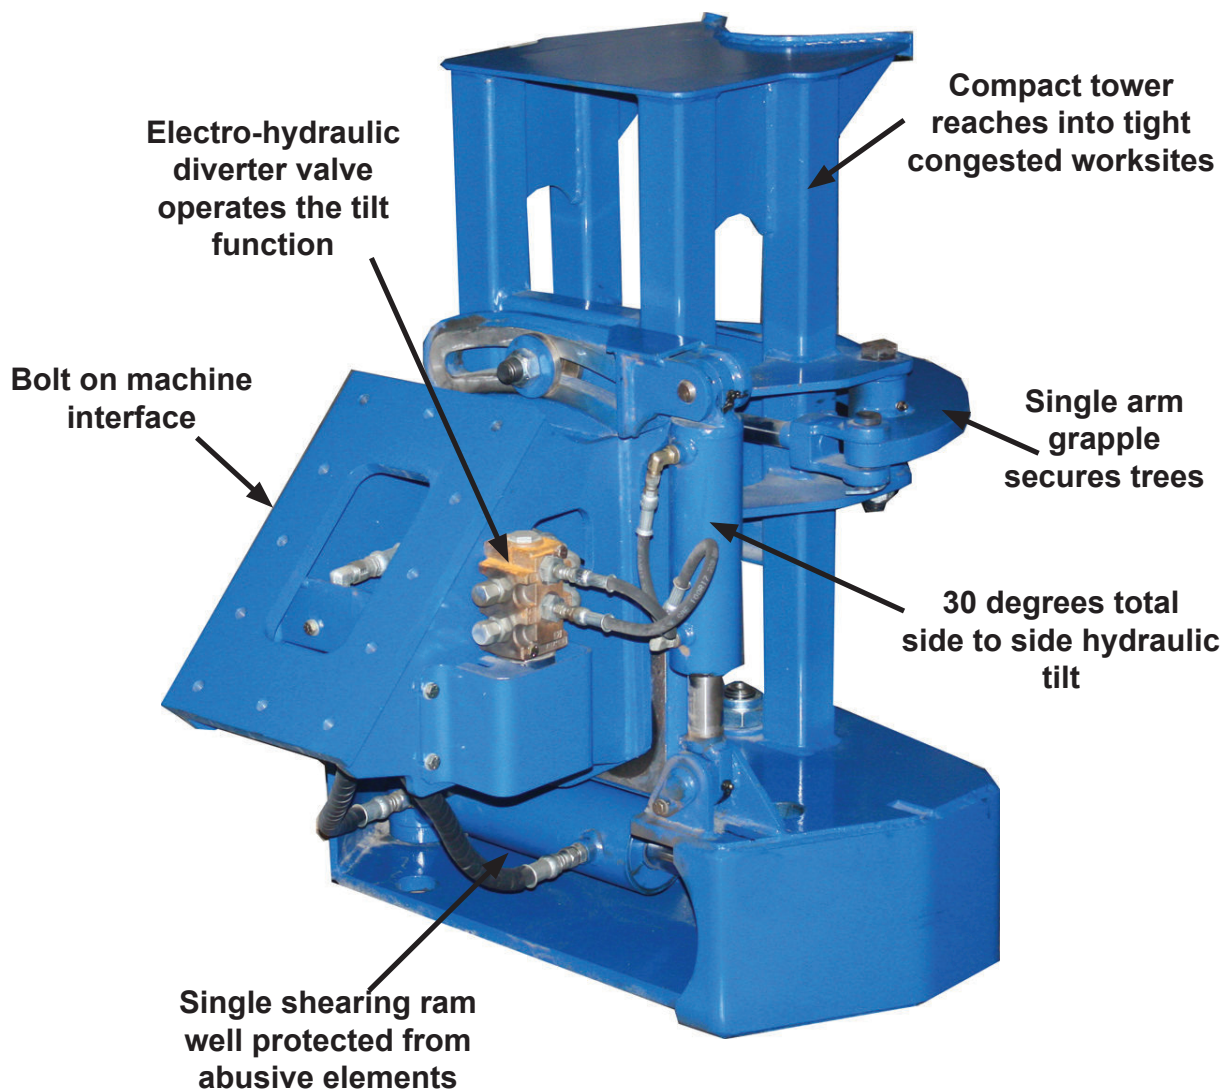

All **Dymax 8" Forestry Tree Shears** features 30 degrees total side to side tilt and are provided with an electro-hydraulic diverter valve kit. Machines must be equipped with two way flow hydraulics.

The **Dymax 8" Forestry Timberwolf Tree Shear** is ideally suited for small excavators weighing between 5-8T and backhoe loaders.

Shearing cylinder is rated at 206 bar and optimum results will be obtained near those levels. Do not exceed 220 bar. Operate shear head at 55-75lpm flow rate.
